

Streamline endpoint management

We simplify and optimize your customer endpoint estate, enhancing IT efficiency and productivity.

The shift to hybrid work and the evolving threat landscape means a solid endpoint management strategy is a necessity to protect organizational resources and data on any device. As a trusted technology partner to businesses like yours, we can help.

1 Workers have adopted new habits but still demand exceptional experiences

- 87% of employees offered flexible work options use them, working remotely at least three days per week.¹
- 66% of business and technology professionals said enabling a hybrid or “anywhere work” environment is a high priority during the next 12 months.²
- Organizations are making long-term decisions about where their people will work, but only 35% of workers are satisfied with their company’s approach.³

2 Growing security risks continue to challenge IT admin teams

- 86% of security leaders agree that outdated PC hardware leaves organizations more vulnerable.⁴
- 68% of organizations have experienced one or more endpoint attacks that compromised data and/or their IT infrastructure.⁵

3 The security landscape is increasingly complex, and businesses turn to third-parties to help manage gaps

- 72% of organizations reported increased complexity within their IT environment over the past two years.⁶

With Microsoft 365 E3 you can simplify and manage all digital endpoints through a single solution.

Get visibility, recommendations, and data that allows you to act.

Streamline endpoint management

Manage company-owned and BYO devices

Deliver the best experience

Manage and protect any endpoint from the cloud

Simplify and optimize endpoint estate to improve IT efficiency

Deliver the best experience

- Keep people, data, and devices protected** with hardware & software security working together.
- Reduce disruptions** with unobtrusive IT features and experiences to help employees stay focused.
- Upgrade to Windows 11** with over 99% app capability and App Assure.
- Embrace inclusivity** with enhanced accessibility, including system-wide live captions & natural voice access.

Manage and protect any endpoint from the cloud

- Manage company-owned and BYO devices** with a single solution providing visibility, recommendations, and data.
- Get on-by-default security** that complies with Zero Trust requirements and automatic updates to Windows and Microsoft 365.
- Build endpoint compliance** with modern servicing of Windows devices.
- Set risk-based conditional access** and app-based conditions policies.

Simplify and optimize your endpoint estate to improve IT efficiency

Deliver company branded messages to users on various surfaces across Windows to share targeted information.

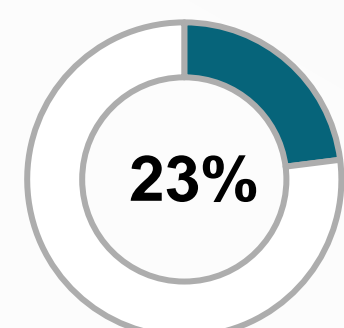

Eliminate print servers on premises and give employees an easier alternative than installing printer drivers on endpoints.

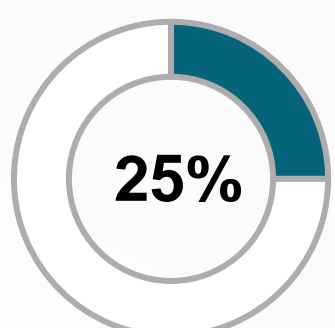

Detect and proactively remediate issues before they impact employees’ experiences.

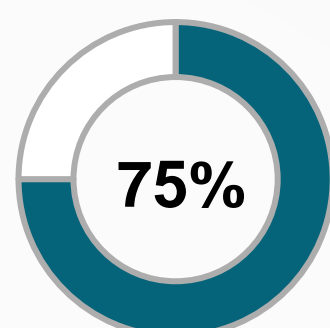

Total Economic Impact

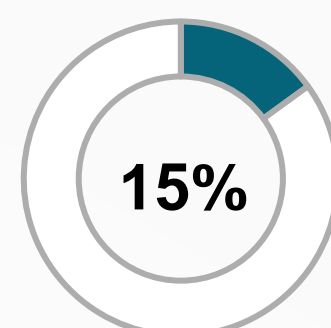

Reduced spending on employee devices through BYOD models

Reduced time spent deploying and managing new software through Intune

Decreased endpoint configuration times through Windows Autopilot

Eliminated help desk tickets and resolution time through self-service password reset
